

VeriLife Overview

“VeriLife ensures your loved ones receive your legacy—emotional, financial, and asset-related—at the right time, securely and reliably.”

Step-by-Step Flow

01 User Activity Monitoring:

Sends gentle reminders if inactive.

02 Trusted Contacts:

People Who Trust Me” section shows who can verify your status.

03 Life Status Verification:

- **Posthumous:** Data delivered securely to trusted contacts.
- **Terminally Ill:** System re-checks after 3 months.
- **Alive:** User must log in within 30 days; otherwise data deletion.

04 Data Management:

Protects privacy by deleting data if inactive beyond limit.

Logic & User Value

Logic : Conditional steps are triggered based on user activity and life status — if inactive, reminders are sent, then status is verified (Alive, Terminally Ill, or Posthumous) and the system takes the appropriate next action.
